

A. feasible

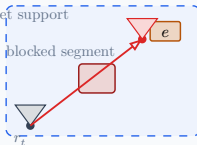

snippet support

$m_{t,i} = 1$; scored row

B. path collision

snippet support

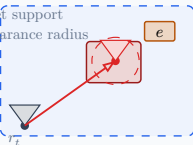

$m_{t,i} = 0$; $\rho_{t,i} = \text{path}$

C. clearance

snippet support

clearance radius

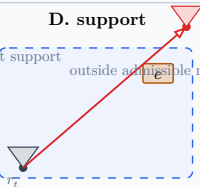

$m_{t,i} = 0$; $\rho_{t,i} = \text{clearance}$

D. support

snippet support

outside admissible map

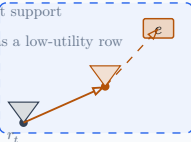

$m_{t,i} = 0$; $\rho_{t,i} = \text{support}$

E. weak evidence

snippet support

kept as a low-utility row

$m_{t,i} = 1$; low gain/support
